

Experiment 3: Installation of Cisco Packet Tracer

Aim:

To install Cisco Packet Tracer software on a computer for network simulation experiments.

Apparatus Required:

- Computer with Windows operating system
- Cisco Packet Tracer installation file
- Internet connection (for downloading and Cisco login)

Procedure:

1. Open a web browser on the computer.
2. Visit the official Cisco Networking Academy website.
3. Sign in using a Cisco Networking Academy account.
4. Navigate to the Cisco Packet Tracer download section.
5. Download the latest version of Cisco Packet Tracer compatible with Windows.
6. Locate the downloaded installation file in the Downloads folder.
7. Double-click the setup (.exe) file to start the installation.
8. Allow the application to make changes to the computer when prompted.
9. Read and accept the license agreement.
10. Select the installation location (default location was used).
11. Click **Next** and then **Install** to begin the installation process.
12. Wait for the installation to complete successfully.
13. Click **Finish** to close the installation wizard.
14. Launch Cisco Packet Tracer and sign in with the Cisco Networking Academy account to activate the software.

Observation:

The Cisco Packet Tracer installation was completed successfully, and the software was installed on the computer without errors.

Result:

Cisco Packet Tracer was successfully installed on the computer and is ready for performing computer network simulation experiments.
